

Gradual improvement expected

Solteq is set to report Q2'25 results on Thursday, August 21. We expect comparable net sales to decline modestly, while profitability continues to improve, with Utilities recovery remaining key to unlocking the company's full turnaround potential.

Comparable y/y net sales development still in the red

Solteq is set to report Q2 results this Thursday amid a Finnish IT services market that remains sluggish due to economic uncertainty and customer cautiousness, as suggested by peer reports and management commentary. We estimate net sales of EUR 12.6m, down 6% y/y, primarily reflecting the impact of the divested Danish healthcare software business, with comparable revenue expected to decline 2%. The company should be able to moderate the pace of decline across both segments. In Retail & Commerce we expect comparable revenue to decline by around 1%, while Utilities is expected to decline 5% y/y.

Profitability is expected to improve in Q2

Following five consecutive quarters of y/y operating result improvements, supported by cost-saving initiatives implemented in 2024, we expect EBIT in Q2 to improve to EUR 0.5m (Q2'24: EUR 0.0m), translating to a 4.0% margin. This improvement is expected to come mainly from R&C, which have become the profitability anchor, delivering healthy margins despite declining sales and the divestment of the more profitable healthcare software business. Utilities, after a substantial Q1 hit, appears on track for a gradual recovery based on management expectations and with recurring SaaS revenue continuing to improve. The segment has significant potential, although the turnaround has taken longer than expected.

ACCUMULATE with a TP of EUR 0.65

Solteq trades at a slight discount to peers on 2025E EV/EBITDA multiples, as peer group multiples have increased recently. The valuation discount widens on 2026E estimates, reflecting longer-term recovery potential. However, visibility on the full-scale Utilities turnaround remains limited, requiring more concrete evidence of sustained recovery. We maintain our ACCUMULATE rating and target price of EUR 0.65.

COMPANY DESCRIPTION: Solteq is a Nordic software and IT-services provider specializing in digital business solutions. Solteq's strength has been in commerce related solutions with a focus on selected sectors, namely the retail and wholesale, industry, energy, and services sectors.

INVESTMENT CASE: Solteq's investment case revolves around the success of executing its strategy of shifting from its IT-services oriented past towards increasingly becoming a software house. Implied margin upside potential is considerable, with segment targets putting margins clearly in the double digits. Growth will increasingly need to be sought from abroad, as domestic growth potential is somewhat restricted within core competencies.

Important Disclosures

Evli Research Partners Plc ("ERP") uses 12-month target prices. Target prices are defined by utilizing analytical techniques based on financial theory including (but not limited to) discounted cash flow analysis and comparative valuation. The selection of valuation methods depends on different circumstances. Target prices may be altered on the basis of new information coming to light in the underlying company or changes in interest rates, changes in foreign exchange rates, other securities prices or market indices or outlook for the aforementioned factors or other factors that may change the conditions of financial markets. The valuation assumptions used are sensitive to changes and can significantly affect fair values. A change of a single percentage point in any used assumption could affect fair values by more than +/-20%. Recommendations and changes by analysts are available at [Analysts' recommendations and ratings revisions](#).

Investment recommendations are defined as follows:

Target price compared to share price	Recommendation
< -10 %	SELL
-10 - 0 %	RECUDE
0 - (+10) %	ACCUMULATE
> 10 %	BUY

ERP may temporarily suspend the rating and, if applicable, the target price to comply with regulations and/or firm policies, in which case a NOT RATED classification is used.

ERP's investment recommendation of the analyzed company is updated at least 2 times per year.

The graph above shows the distribution of ERP's recommendations of companies under coverage on the 16th of May, 2025. If recommendation is not given, it is not mentioned here.
