

## Strong Q3 EBITA margin

DT's Q3 earnings were slightly better than estimated as EBITA margin already topped 15%, however the company also trimmed its growth outlook for the next couple of quarters.

- DT Q3 revenue increased by 10.6% y/y to EUR 27.1m, compared to the EUR 27.6m/27.4m Evli/consensus estimates, while adjusted EBITA was EUR 4.2m vs the EUR 4.0m/3.8m Evli/consensus estimates. Profitability topped the 15% medium-term target, enabled by growth, improved productivity and sales mix. Result is expected to slightly improve in Q4.
- Medical (MBU) revenue increased by 0.6% y/y to EUR 10.9m, compared to our EUR 11.3m estimate. Sales still lagged behind expectations as the Chinese market has remained challenging and price competition has continued. Sharp market decline has however stopped and the Chinese market is likely to recover slowly. MBU sales are expected to decline slightly y/y in Q4.
- Security (SBU) gained by 16.2% y/y to EUR 11.3m vs our EUR 11.2m estimate. Sales grew at an above-market rate, boosted by both CT and line scanner detector solutions for the aviation industry. The outlook for Western aviation markets remains strong, in addition to which border control and critical infrastructure security investments should accelerate. SBU growth should continue q/q in Q4 but remain flat y/y.
- Industrial (IBU) revenue grew by 24.0% y/y to EUR 4.9m, compared to our EUR 5.1m estimate. Food industry demand was strong but also in industrial CT imaging and the specialty tire industry. Line scanner products in particular saw growing demand. IBU sales grew at an above-market rate in Q3, and growth should continue in Q4 albeit at a clearly more moderate rate.
- DT expects its revenue to remain stable y/y in Q4'24 and Q1'25; the company refines its previous outlook of double-digit growth in H2'24 to growth in H2'24.

Evli Research Partners Plc ("ERP") uses 12-month target prices. Target prices are defined by utilizing analytical techniques based on financial theory including (but not limited to) discounted cash flow analysis and comparative valuation. The selection of valuation methods depends on different circumstances. Target prices may be altered on the basis of new information coming to light in the underlying company or changes in interest rates, changes in foreign exchange rates, other securities prices or market indices or outlook for the aforementioned factors or other factors that may change the conditions of financial markets. The valuation assumptions used are sensitive to changes and can significantly affect fair values. A change of a single percentage point in any used assumption could affect fair values by more than +/-20%. Recommendations and changes by analysts are available at [Analysts' recommendations and ratings revisions](#).

Investment recommendations are defined as follows:

|                                      |                |
|--------------------------------------|----------------|
| Target price compared to share price | Recommendation |
| < -10 %                              | SELL           |
| -10 - (+10) %                        | HOLD           |
| > 10 %                               | BUY            |

ERP's investment recommendation of the analyzed company is updated at least 2 times per year.

The graph above shows the distribution of ERP's recommendations of companies under coverage on the 23rd of October, 2024. If recommendation is not given, it is not mentioned here.
