Slowly improving, volumes needed

Suominen's Q1 results were quite well in line with consensus estimates, and bottom line was slightly lower than we estimated. The EUR 8.3m gross profit came in quite close to our estimate, however increased operating expenses meant EBITDA was a bit softer. Suominen initiates a cost savings program which aims for EUR 10m in savings.

- Suominen Q1 revenue grew by 3.4% y/y to EUR 117.5m, compared to the EUR 117.0m/115.4m Evli/consensus estimates. Americas was EUR 73.6m vs our EUR 75.0m estimate while EMEA amounted to EUR 43.9m vs our EUR 42.0m estimate. Stock levels for Asian imports are increasing across both of Suominen's business areas. Sales volumes declined y/y, but higher raw materials prices, improved sales mix and strong commercial execution led to increased sales prices. Currency fluctuations also had a positive impact of EUR 0.9m on top line.
- Gross profit landed at EUR 8.3m, compared to our EUR 8.8m estimate, and gross margin was 7.1% vs our 7.5% estimate.
- Comparable EBITDA was EUR 4.1m, compared to the EUR 5.3m/4.2m Evli/consensus estimates. Comparable EBIT amounted to EUR -0.3m vs the EUR 0.8m/-0.3m Evli/consensus estimates. Operating expenses rose. Currency fluctuations had a negative impact of EUR 0.5m on EBITDA.
- Suominen also initiates a cost savings program which aims to bring approximately EUR 10m savings across operations and global functions, to be realized over the next 24 months.
- Suominen guides its FY'25 comparable EBITDA to increase relative to the EUR 17.0m comparison figure (unchanged).

Evli Research Partners Plc ("ERP") uses 12—month target prices. Target prices are defined by utilizing analytical techniques based on financial theory including (but not limited to) discounted cash flow analysis and comparative valuation. The selection of valuation methods depends on different circumstances. Target prices may be altered on the basis of new information coming to light in the underlying company or changes in interest rates, changes in foreign exchange rates, other securities prices or market indices or outlook for the aforementioned factors or other factors that may change the conditions of financial markets. The valuation assumptions used are sensitive to changes and can significantly affect fair values. A change of a single percentage point in any used assumption could affect fair values by more than +/-20%. Recommendations and changes by analysts are available at <u>Analysts' recommendations and ratings revisions</u>.

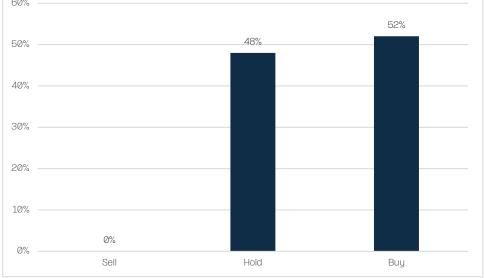

Investment recommendations are defined as follows:

Target price compared to share price

< -10 % -10 - 0 % 0 - (+10) % > 10 % Recommendation SELL RECUDE ACCUMULATE BUY

ERP may temporarily suspend the rating and, if applicable, the target price to comply with regulations and/or firm policies, in which case a NOT RATED classification is used.

The graph above shows the distribution of ERP's recommendations of companies under coverage on the 23rd of October, 2024. If recommendation is not given, it is not mentioned here. As ERP is currently updating its ratings methodology, the graph will be updated in due time to reflect the changes.
